

HOLIDAY RAMBLER® *Trip*

THE FAMILY VACATION, REINVENTED

Built for family fun and big on comfort and safety, the Holiday Rambler® Trip™ is the first Holiday Rambler motorized RV model built bumper-to-bumper with Navistar® resources and innovations onboard.

BIG FUN, AFFORDABLE PRICE TAG

The Holiday Rambler® Trip™ takes many of the cutting-edge RV advancements perfected by our Navistar® resources and packages them in an RV that's easy on your budget without skimping on performance.

MAXXFORCE® ENGINES—PURE DIESEL POWER

As a Navistar company, Monaco® RV has access to some of the world's top engine designs. New Holiday Rambler motorized RVs, including Trip, are equipped with MaxxForce® diesel engines. Lightweight, quiet and fuel-efficient, these engines are carrying Holiday Rambler into the future of RV travel.

NO-HASSLE 2010 EMISSIONS COMPLIANCE

All of our 2010 motorized RVs are equipped with the MaxxForce® Advanced EGR system. It's the only no-hassle solution for complying with 2010 emissions regulations. Unlike other solutions, there are no extra equipment to maintain or fluids to add. When you own the Trip, you simply drive it like RVs have always been driven.

STORAGE TO SPARE

Designed with an active family's many activities in mind, Trip offers a whopping 161 cubic feet of easy-access, outside and rear pass-through storage—more than competitors in its class.

AN RV THAT DRIVES LIKE A CAR

Sit back, relax, and drive. A narrower chassis makes Trip easier to maneuver and park than competing RVs. Aerodynamic design advances we've developed through wind tunnel research improve fuel economy. An ergonomically designed cockpit featuring improved vision angles, easy-reach cup holders and an iPod™ dock makes driving Trip more like driving a car than an RV.
